FOR IMMEDIATE RELEASE

Intesource helps companies weather the economic storm

Phoenix, AZ – February 3, 2009 – Intesource, the e-sourcing experts, announced today that they achieved growth in 2008 equal to twice the industry average as estimated by AMR, a leading industry research group.

Intesource closed out 2008 by adding more new customers than the industry average, while maintaining an existing client retention rate of greater than 98%. Intesource has leveraged their proven track record of savings – historically exceeding 18%, and their easily implemented software as a service (SaaS) model to drive this result. It has been reported that SaaS models are seen as easily implemented tools that allow for quick access to available savings – an ideal solution in trying economic conditions.

Intesource has consistently identified potential areas of success within their customer organizations and assisted them in capitalizing on these opportunities, resulting in real savings to the bottom line during a time when companies need it the most. Intesource President and Chief Operating Officer, Tom Webster, stated, "Our full-service offers and ability to execute are unparalleled in this space. The strategic partnership, overall value, and superior ROI we deliver are clearly benefiting companies in this challenging economic climate." He went on to add, "nearly any organization struggling with rising costs or profitability challenges can receive immediate benefit from our solutions". As proof of this, where store closings and layoffs almost seem like everyday news, NOT ONE Intesource customer fully utilizing the solutions, has laid off one employee through this downturn.

Companies interested learning more about how Intesource and their customers experience success in savings and efficiencies through sourcing are encouraged to attend the annual Innovation '09 conference exploring best practices in sourcing and procurement. The 6th annual Innovation conference will be held March 8-10 in Scottsdale, Arizona at the Scottsdale Plaza resort. Leading organizations from across the nation will gather to exchange ideas, experiences, and best practices surrounding sourcing and procurement. In an intentionally intimate atmosphere, Intesource takes the role of observer during the three day event and allows their customers to share experiences, best practices, and ideas with the group. Anyone interested in learning more about how to implement e-sourcing tools and services into their buying organization and streamline their sourcing practices is welcomed to attend.
